

# TekTube GENERATION *flex*

The next generation

in pool and spa pipe is now available from **TekTube**

## NeuGen® UltraFlex

Last year, **TekTube** changed the industry standards with our NSF and IAPMO approved NeuGen Pipe.

Designed with a tighter, rigid spiral within a more flexible wall, that formulation exceeded industry standards. But even as we were being recognized

by certification committees for the NeuGen product line, we were testing and developing the

next generation. This year, **TekTube** is proud to introduce our NSF & IAPMO approved

**NeuGen® UltraFlex Pipe.** Stronger and even more flexible, this thicker wall

design is now the only choice for professional contractors who stand behind their products.

The improved flexibility will save

installation time in various situations. **TekTube's** efficient pipe manufacturing & Roscom's raw material manufacturing, all within one location, saves us

cost and saves you money. **Contact Jeff Lackman**
